

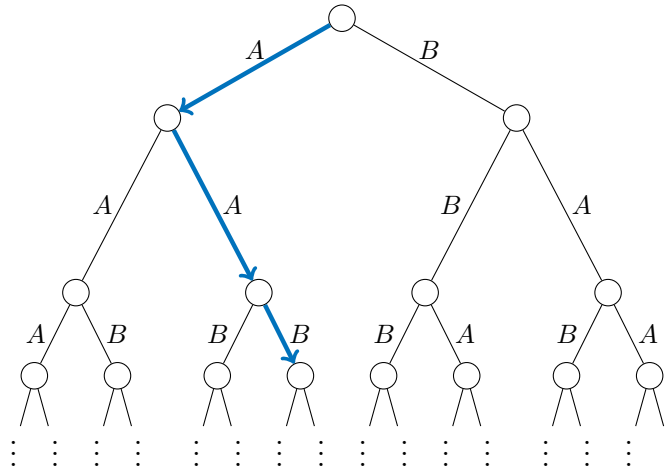

FIGURE 1. I guess I couldn't help myself from throwing in something complicated looking. But this works out relatively well, actually. Well I don't know. I'm rambling to fill up characters on a page.

This is a simple document to test out the insertion of annotations on a control PDF.

I'll write a famous test sentence for previewing fonts since it contains every letter in the alphabet.¹

I should test how different font font sizes interact with the annotations and throw in a figure caption, too.

The quick brown fox jumps over the lazy dog.

The quick brown fox jumps over the lazy dog.

The quick brown fox jumps over the lazy dog.

The quick brown fox jumps over the lazy dog.

The quick brown fox jumps over the lazy dog.

The quick brown fox jumps over the lazy dog.

The quick brown fox jumps over the lazy dog.

The quick brown fox jumps over the lazy dog.

The quick brown fox jumps over the lazy dog.

The quick brown fox jumps over the lazy dog.

The quick brown fox jumps over the lazy dog.

That is a little unsatisfying that the largest `\larger` doesn't fit. Oh well.

¹There's a term for this: it's *pangram*.
